Dear course participants and presenters,

Thank you for the information you sent me regarding the Collaborative Case Study presentation in Riga. Themes are already clear and it is time to announce the cases you have suggested, presenters' names, structure of groups and other necessary information.

All participants who do not make presentation please put and share materials from your country in separate Case study sections (Estonian group shall be put in *case study – Estonia* files part, Latvian group – in *case study – Latvia* files part, etc.). More detailed information you will find on our course web „How to add files". These submitted files (charts, satellite and radar data, observations, warnings etc.) may be easy used by your country group presenter or checked by instructors. You even could share information with participants from another groups if they lack of additional material from your country or you need data from them (in this case, you do not need to send large files by emails – simply put it in the proper place I mentioned). If you have questions or faced to uncertainties regarding case analysis, please use "Collaborative Cases – Group discussions" forum.

Note: to make case study presentation more engaging, we hope you stay active after the PowerPoint files submission in the Moodle. Each group shall review another group's files before meeting in Riga, and prepare **2** questions in total (one group will get 2 questions from different countries during the CCS session). I will inform you in the forum later about the review task.

Finally, participants, who participate only in the online phase, are kindly invited to take part in the case study preparation in order to gain more experience in this topic.

1. Estonian group will present „**Winter storm Birgit, case of 12-12-2022"**
Presenter: **Karl Erik Krepp**
Team members (Kaido Ennok, Katriin Käärik) are responsible for storing data from Estonia into Moodle https://training.eumetsat.int/mod/folder/view.php?id=15986
and help their colleague to prepare ppt.

2. Latvian group will present **"Storm on 7-8 of October, 2023"**
Presenter: **Karīna Rožkova**
Team members (Jānis Kleperis, Kristaps Veitners, Alise Leitāne, Ilona Nīgale) are responsible for storing data from Latvia into Moodle https://training.eumetsat.int/mod/folder/view.php?id=15987
and help their colleague to prepare ppt.

3. Lithuanian group will present **"Stronger than expected, case of 14-01-2022"**
Presenter: **Tadas Kantautas**
Team members (Giedrė Andruškienė, Saulius Šatas) are responsible for storing data from Lithuania into Moodle https://training.eumetsat.int/mod/folder/view.php?id=15988
and help their colleague to prepare ppt.

4. Polish group will present **"Strong wind over Poland 21st of October 2021"**
Presenter: **Jakub Majchrzak**
Team members (Michal Kowalczuk, Małgorzata Koper) are responsible for storing from Poland into Moodle https://training.eumetsat.int/mod/folder/view.php?id=15989
and help their colleague to prepare ppt.

5. Ukrainian group will present **"Cyclone Relli in Ukraine on 17-20 of September 2022"**
Presenter: **Alla Bilozerova**
Team members (Diana Kryvobok, Serhii Mysnyk) are responsible for storing data from Ukraine into Moodle https://training.eumetsat.int/mod/folder/view.php?id=15990
and help their colleague to prepare ppt.

INFORMATION for presenters

Your presentation should include a short analysis of the event (up to 15–20 slides and not longer than 20 minutes strictly). It would be very useful if you choose **the conceptual model(s) which fits the best to your case.** Moreover, the usage of satellite information is very much appreciated.

Presentations will be shown in **the first session on 7th November/Tuesday** (please check updated information later on the Moodle schedule when it becomes available).

Please put your final presentation (ppt or pptx format) on Moodle Home page in section „Collaborative Case Study " expanded window – at the bottom „Upload the Collaborative Case Study Presentation". **Group leaders have to upload their final presentations here:**
https://training.eumetsat.int/mod/folder/view.php?id=15994

The deadline is 2 November, 22 UTC.

If you need some support or information concerning pre-course collaborative case studies, please let me know.

Izolda
