Agenda:

- ✓ Introduction
- ✓ Main achievement 2013-2015 report:
- ✓ 2016 survey analysis
- ✓ 2016-2018 action plan:

Centre d'Excellence
en Télédétection de
Casablanca

Introduction

- Casablanca 's Centre of Excellency (CoE) is hosted by the Moroccan met Office in Casablanca since December of 2012 with the support of WMO and EUMETSAT.
- Casablanca's CoE target the African French- speaking countries (17) ,
- Action plans are tailored upon the region's training needs through regular online survey with three goals:
 - How previous training impact?*
 - What are the training priority areas?*
 - what would be the most appropriate methodological approaches to follow for training?*

Casablanca

Strategy, Fundamentals

Vision

A center of excellence focused on the use of satellite data for new applications development and knowledge transfer while building synergies with its partners including the Niamey CoE.

to systematically improve the use of satellite data for meteorological and hydrological applications over the next 10 years in all Member countries, with a focus on meeting the needs of the developing countries

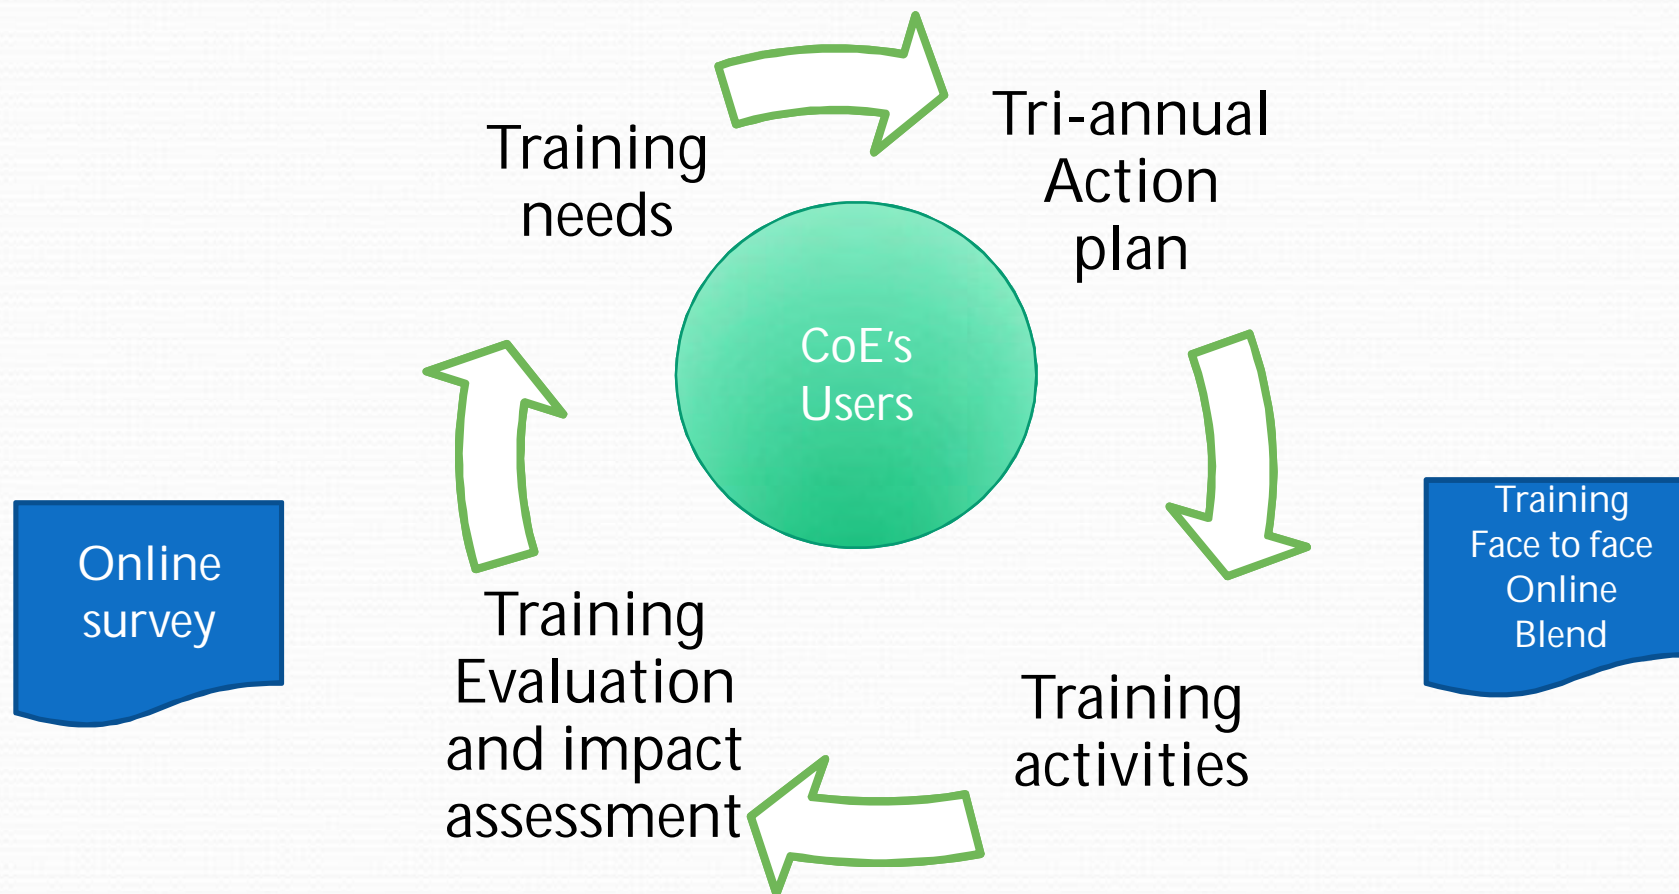

A STRATEGY FOR EDUCATION
AND TRAINING
IN SATELLITE MATTERS,
WMO 1993

The Objectives

- To identify and to update training needs of the region,
- To achieve training activities that meet the needs priorities of the region,
- To develop and maintain proficiency in providing online training;
- To build synergies with others CoE in particular Niamey Center.

Methodological Approach

Centre d'Excellence

Casablanca

2013-2014 Main achievements

	theme	days	type	Part.
2013	Marine forecasting, nowcasting	5	Face to face	24
	RFG: online survey discussion	.5	online	16
	Aviation week	5	online	67
	RFG: NWP	.5	online	29
	RFG: fog modelisation	.5	online	27
2014	RFG: Marine case studies	.5	online	16
	RFG: now casting	.5	online	13

Casablanca

2015-2016 Main achievements

	theme	days	type	part
2015	Climatology and the use of Data base Information system	3	Face to face	15
	QMS for monitoring the aeronautical meteorology	1	online	15
	Production of a training module within asmet8 project on the "Extreme High Swell Events on the Moroccan Atlantic Coast	Asmet 8 project		
	Nowcasting for aeronautical production improvement	3	Face to face	15
2016	Training event : Monitoring and improving aeronautical production	3	online	60
	Online survey: assesement and training needs	Online survey

Casablanca

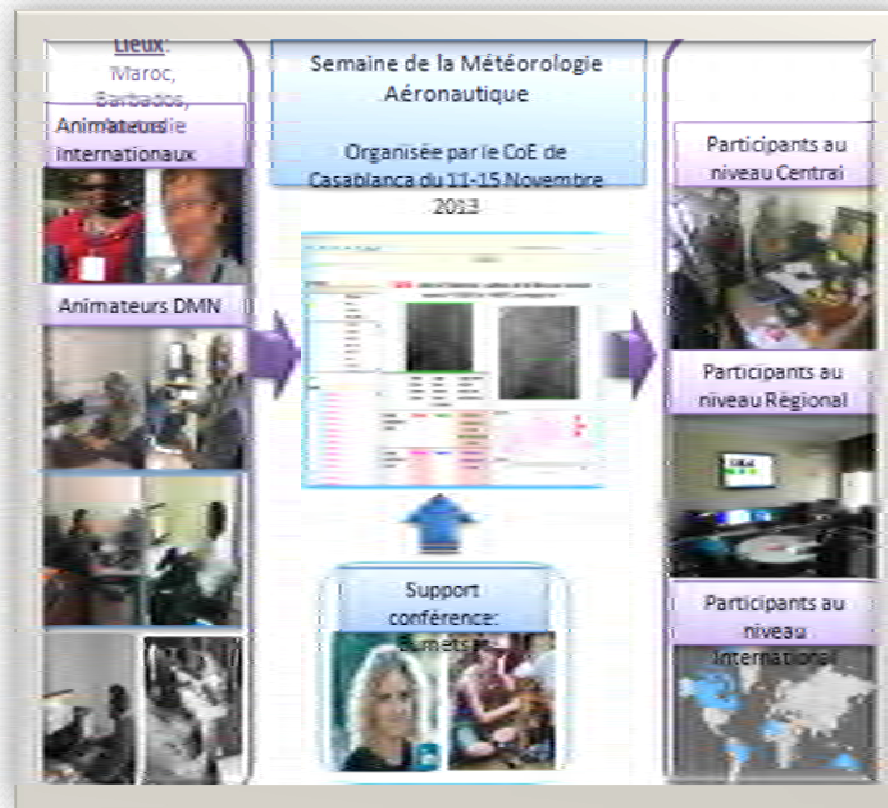

Training activities

- CB workshop : «Advanced application on marine forecasting », 20-24 may 2013,
- 10 countries, 22 participants

- Online aviation week training event,
- 67 participant, 10 countries,

Centre d'Excellence
en Télédétection de
Casablanca

Main Achievements, Training activities

- Online training event on quality monitoring of aeronautical meteorology production
- 3 days training, 60 participants

Casablanca

Extreme High Swell Events on the Moroccan Atlantic Coast

This training module is produced by la Direction de la Météorologie Nationale in Morocco in partenary with Eumetsat and

The training module describes the appropriate process in forecasting high swell events, and aims to improve the ability of marine forecasters to forecast extreme marine events related to high swells.

2016 Online Survey

Previous training assessment

Training content (usefull for my
professionnel improvement),

1 : not satisfied at all
5 : very satisfied

Training approach (appropriate length
of time, adeque rhythm),

Quality of the animation

Survey panel:

Numbers: 35
Profil: weather
More than 70%
participate to more than
trainin organised by the
Casa CoE

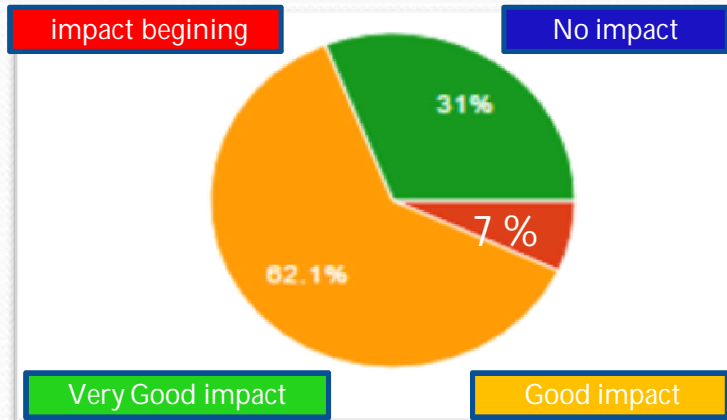

Countries who
participated to the
2016 online survey

2016 Online Survey

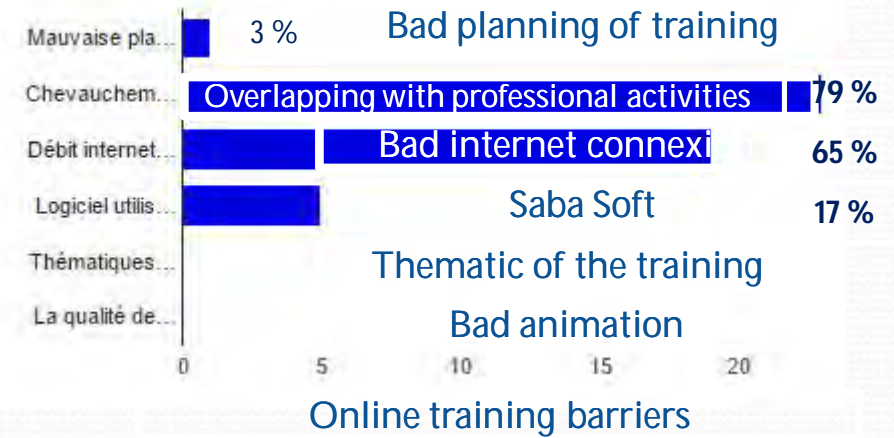

Impact, needs and barriers

impac tof the training on professional activities

Users needs priorities:

1. Forecasting General 79 %
2. Aeronautical 65 %
3. Marine forecasting 65 %
4. Use of satellite in climate service, 50 %
5. Drought 17 %
6. weather modification 17 %

Casablanca

Future plan

activities	objectives	date
2016 Online survey	Assessment of the previous training and training need for next.	2016
3 days Training event	Quality monitoring	April 2016
1 day training event	CB on the use of remote sensing data and RGB product	May 2016
RFG on Climate	Needs of training regarding the use of satellite in climate services	Juin 2016
2-3 day training event	Use of satellite data for climate services	September 2016
1 day training	Marine meteorology	TBD
